# Installing the Horror in the Library VR Game Demo #1 Meta Quest App

## What you will need

- Meta Quest 2, 3 or Meta Quest Pro Headset
- The Charger, with Cable
- PC or Mac with the Meta Quest Developer Hub application installed

### Setup

- 1. Make sure your Meta Quest Headset is up to date before installing. The same is true for the MQDH app. Mainly because it will want to do that before you do anything any case.
- 2. Connect the Headset to the computer using the charging cable.
- 3. You may need to ensure that you have developer mode enabled on you Meta Quest Headset. To do this follow these instructions: <u>https://developer.oculus.com/documentation/native/android/mobile-device-setup/?locale=en\_GB</u> (Go to Useful Links and Videos in this documents to see a video tutorial to do it all through the headset.)
- 4. Launch the developer hub
- 5. Turn on the headset and put it on.
- 6. A message will appear on your headset asking to allow the computer to access files on the device. Select Allow or always allow.
- 7. Take the headset off and you will see that it is connected

It takes about a minute as the app is about 1Gb.

11. Once it has installed go to the headset and bring up the Universal Menu:

13. The use the Apps Filer (All (xx) in the Top right to select Unknown Sources

14. You will then see the App Listed by its name:

Applin
- Library
Running apps from unknown sources max     Prohibits piracy, illicit module
Unknown sour
C C
SideQuest quest.side.vr/quest.side.vr.Signues
and gninActivity
- App Library
The initial sector of the sect
C 🗲 🗲 🗢 10:48 🕜 👩 🖪 🔂 🐜 🙀

- 15. The app takes about 30 seconds to load for the first time. You will see the Unity Logo Appear
- 16. It will change colour slightly and you will start to hear music when it is nearly completed loading:

17. Then you will be taken to the Library of the Mad Professor

18. Follow his instructions but beware he can be a bit funny sometimes!19. Have fun!
